#### **SUMMARY OF THE REASONS FOR DECISION:**

The DVD entitled *Road Trip* is classified as:

Objectionable except if the availability of the publication is restricted to persons who have attained the age of 16 years.

*Road Trip* contains a feature of the same name, along with a number of additional components, which are accessed through menu screens. The feature has previously been classified by the Classification Office as a 35mm film and as a DVD (of a different zone to this DVD). The film (publication reference number 1070) was classified as objectionable except if the availability of the publication is restricted to persons who have attained the age of 16 years, with the descriptive note 'Contains nudity, drug use and offensive language'. This classification decision was registered on 24 July 2000. The Zone 1 DVD publication reference number 2199) contained a feature identical to the 35mm film, along with a number of additional moving image and still components. It received the same classification and descriptive note as the 35mm film. This decision was registered on 10 January 2001.

The version of the feature on this DVD appears to be identical in content to the film and the Zone 1 DVD. The feature runs for approximately four minutes less than the features on the previously classified publications, which is probably attributable to the different running speeds of the different mediums. In addition to the feature, the DVD contains additional moving image components, including deleted scenes, theatrical trailers and behind-the scenes footage. These components do not contain any material that would warrant a more restrictive classification than that given to the previously classified versions of *Road Trip*.
